## Aspiring Software Engineer

Final year student passionate about web development

## About me

I am a computer science final year student with a strong interest in web development and python. I enjoy creating responsive websites. My goal is to become a software engineer and build impactful software solutions.

## Skills

## Internships

### Internship One

Worked on front-end development projects using core JavaScript, HTML, and CSS. Developed interactive web components such as dynamic forms, sliders, and modals.

## Internship Two

Completed tasks and mini-projects using core Python concepts. Strengthened understanding of code logic, clean coding practices, and real-world problem solving.
